TRUNG HUY, NGUYEN

Position: Front-End Developer
Phone: (84) 0333096457
Email: trunghuy1701@gmail.com
Portfolio: portfolio.cocahome.click

OBJECTIVE

Front-End Developer with 7+ years of experience, many of them building and maintaining production websites for Japanese clients across projects built with Next.js, Nuxt.js, React and Vue.js. Owner of front-end projects: upgraded Node.js from older versions to the latest, applied security patches, and traced a Googlebot indexing outage to a GCP network component with the back-end team. Experienced with Contentful (content modeling, custom Editor.js extension), GitHub Actions CI/CD and GSAP/Three.js animation. Built Node.js API-integration services for GO Job, a driver recruitment site later handed over to the client. Own CVE management for the sites I maintain: dependency audits, risk triage, assessing whether each vulnerability actually applies, and targeted fixes verified by lint, type, test and build checks. Long-term goal: grow into a Fullstack Developer, currently strengthening SQL and database skills.

SKILLS

Programming Skills

- Front-end: TypeScript, Next.js, Nuxt.js, React.js, Vue.js, Vite, HTML5, CSS3, SASS, Tailwind CSS, Vanilla Extract, responsive design
- Animation & 3D: GSAP, Three.js, Animate.js
- CMS: Contentful (content modeling, custom extension development)
- Back-end & API: Node.js (runtime maintenance, API integration), RESTful API, GraphQL, Axios
- CI/CD & tooling: GitHub Actions, Git
- Security & CVE management: dependency audits (npm audit), CVE triage and risk assessment, vulnerability applicability analysis, targeted fixes verified by lint/type/test/build, XSS prevention, CSP configuration
- AI-assisted development: Claude Code (daily), AI agents & subagents, MCP, local LLM (Ollama), prompt & context engineering
- State, routing & data fetching: Redux, Redux-Saga, Jotai, SWR, React Router; UI: Ant Design
- Mobile: React Native

Soft Skills

- Collaboration with Japanese clients and back-end teams; Agile/Scrum; daily communication in English via chat

EXPERIENCE

Gianty Vietnam — Front-End Developer | *01/2022 – Present*

Main Responsibilities

- Owner of front-end for Japanese client sites (DeNA group), including wonderia.jp and dena-ailink.com; Lighthouse (Oct 2026): SEO 100/100 and Accessibility 89-90 on both, dena-ailink.com Best Practices 100 and desktop Performance 91 (LCP 1.1s)
- Investigated a production incident on wonderia.jp where Googlebot stopped indexing pages after a multilingual release; worked with the back-end team and traced the root cause to a GCP network component
- Maintained Node.js services: applied security patches and upgraded Node.js from older versions to the latest on most maintained projects; reduced page size on production sites
- Designed Contentful content models and built a custom Editor.js extension for content entry, exporting structured data consumed by the front end
- Built and updated UI animation with GSAP, Three.js, Animate.js
- Built and maintained CI/CD pipelines with GitHub

Framework: Next.js, Nuxt.js, Vite, Node.js, GSAP, Three.js, GraphQL, Redux, jQuery

Project List

- dena.com — Position: Maintain, worked across all pages; Team size: 8

- alumni.dena.com — Position: Owner; Team size: 3
- go.goinc.jp — Position: Develop and maintain (Contentful security fixes, news content model with auto-generated integer URLs, new content features, Contentful export to JSON/Markdown for the front end); Team size: 5
- wonderia.jp — Position: Owner; Team size: 2
- dena-ailink.com — Position: Owner; Team size: 2
- DeNA Games Tokyo (denagames-tokyo.com) — Position: Owner (development, maintenance, QC and CI/CD); Team size: 3
- Gambaru — recruitment platform connecting recruiters and job seekers (Next.js, GraphQL, Redux, SCSS). Position: Maintain and fix logic/UI bugs
- GO Job — driver recruitment site (Node.js API integration). Position: Develop; handed over to the client's in-house team
- Ckingdom — game landing page (fullpage.js, HTML/CSS, jQuery). Position: Maintain and update layout
- Ido — landing page (HTML/CSS, jQuery). Position: Build website from design

Minerva Solution — Front-End Developer (solutions company; projects closed) | *08/2020 – 12/2021*

Main Responsibilities

- Slice layout (desktop/mobile) using HTML/JS/CSS
- Coordinated with the back-end team to support API/JSON templates

Framework: HTML, CSS/SASS, JS/jQuery, React.js, Vue.js, Ant Design, Three.js, Mapbox, Leaflet, HLS, WebSocket

Project List

- Sale Admin — real estate transaction management. Position: Develop and review source code; Team size: 5
- Super App for Sale Admin — management of the Sale Admin page. Position: Develop and review source code; Team size: 3
- CCTV App — camera management and settings, including safe-zone detection in camera view. Position: Develop and review source code; Team size: 3
- Platform Workflow — task management, workflow creation for customers. Position: Develop and review source code; Team size: 2
- Internet Banking — online banking for customers and businesses. Position: Develop and review source code (Vue.js); Team size: 8

Thien Duong Cong Nghe — Front-End Developer (solutions company; projects closed) | *05/2019 – 08/2020*

Framework: React.js, React Native, Redux-Saga, Ant Design

Project List

- Fixxy Admin Web — member shop information management. Position: Develop with React.js + Ant Design; Team size: 5
- Emartmall App — mobile shopping app. Position: Support mobile app development with React Native + Saga; Team size: 3
- ERP App — karaoke room and reception management. Position: Develop with React Native + Hooks + Saga; Team size: 3

EDUCATION

University of Science (HCMUS) — 2013 – 2017

College Diploma (Associate), Major: Information Technology — graduated 2017

LANGUAGE

English: solid reading and writing, daily chat with Japanese clients; basic conversational ability, meetings held with an interpreter.
