OBJECTIVE

I have hands-on experience in IT hardware support and troubleshooting, including computer assembly and repair, printer and CCTV camera installation, and on-site technical support for retail stores, combined with more than 7 years as a Front-End Developer building complex web systems for Japanese clients. This mix of practical IT support experience and a strong technical background allows me to quickly diagnose and resolve issues, set up and maintain computers, printers, networks, and office software, and support end users effectively. I am seeking to grow in an IT Helpdesk / IT Support role where I can apply my troubleshooting skills, technical foundation, and friendly, service-minded attitude to keep systems and users running smoothly.

SKILLS

Programming Skills

- HTML5, CSS3, Bootstrap
- Frontend frameworks & libraries: React.js, React Native, Vue.js, Next.js, Nuxt.js, Vite
- React ecosystem: Redux, Redux-Saga, Axios, Ant Design
- Node.js (back-end / runtime maintenance)
- Animation & 3D: GSAP, Three.js, Animate.js
- CMS: Contentful (custom extension development)
- CI/CD: GitHub Actions
- CSS preprocessing: SASS, Tailwind CSS
- Responsive design for mobile
- Git and version control
- Testing and debugging
- RESTful API integration, GraphQL
- UI/UX experience, Photoshop

Soft Skills

- Eager to learn new technologies
- Teamwork
- Time management
- Business communication
- Friendly and sociable, good communication

Other

- Experience with Agile and Scrum development process

IT Support Skills

- Computer hardware assembly, installation, and troubleshooting
- Printer, camera, and office peripheral setup and maintenance
- Basic network and Wi-Fi troubleshooting
- Software installation and office software support
- Email and user account setup and management
- Friendly, service-minded end-user support
